+91 8838584549 — vijayarajunnikrishnan@gmail.com — vijaya-raj — vijayaraj08

Summary — Dynamic AI and Data Science graduate with hands-on experience in Python, machine learning, and data analytics. Proficient in React.js, HTML, CSS, and JavaScript, with a strong foundation in developing responsive, user-friendly interfaces and implementing real-time features using Socket.IO. Seeking a challenging role to leverage both AI knowledge and software development skills to create innovative solutions. Committed to driving business growth, enhancing user experiences, and optimizing processes through data-driven insights and cutting-edge technology in a forward-thinking organization.

Skills

- **Programming Languages:** Python, R programming, HTML, CSS
- **Scripting Language:** Javascript, Web RTC, Socket.io
- **Cloud:** AWS
- **Artificial Intelligence:** Machine Learning, Deep Learning, NLP
- **Data Science:** Data Analysis, Data Mining, Data Visualization
- **Data Visualization Tool:** PowerBI
- **3D Graphics Software:** Blender

Experience

Insta VC

Jul 2024 – sep 2024

Software Developer

- Worked on the development of web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), contributing to both frontend and backend development.
- Designed and implemented responsive user interfaces with React.js, ensuring a seamless and intuitive user experience across various devices.
- Developed backend services and RESTful APIs using Node.js and Express.js, handling user authentication, data processing, and integration with the frontend.
- Implemented real-time features and socket communication, enhancing user interaction and engagement within the application

InternShip

AWS Intern

Apr 2023 – May 2023

Retech Techno solutions, Chennai, India

- Developed and maintained machine learning projects in Python, focusing on data preprocessing, feature selection, and model training
- Implemented machine learning algorithms including Linear Regression, Random Forest, and Gradient Boosting for sales forecasting
- Gained hands-on experience with AWS Identity and Access Management (IAM) policies, ensuring secure and appropriate access controls for various AWS resources.
- Developed and managed serverless applications using AWS Lambda, automating workflows and processing data efficiently.
- Implemented best practices for AWS security and governance, leveraging IAM policies to maintain least privilege access.

Education

SRM Valliammai Engineering College

B. Tech - Artificial Intelligence and Data Science - CGPA: 8.5

2020-2024

Chengalpattu, Tamil Nadu

Higher Secondary Education

Sri Aurobindo Mira Matriculation Higher Secondary School - Percentage: 76

2019-2020

Madurai, Tamil Nadu

Secondary Schooling

Sivakasi Nadaras Matriculation Higher Secondary School - Percentage: 85.6

2017-2018

Madurai, Tamil Nadu

certification

Python for Data Science	NPTTEL (2023)
Fundamentals of Data Science Phase 1	SRMVEC (2023)
Fundamentals of Data Science Phase 2	SRMVEC (2023)
Python Programming	SIMPLILEARN (2022)
Python for Machine Learning	GREAT LEARNING ACADEMY (2022)

Projects

Skin Cancer Classification Using Deep Learning	Feb 2023 – May 2023
– Objective: Developed a skin cancer classification model using a Convolutional Neural Network (CNN) framework in Python and TensorFlow to aid in medical diagnosis – The CNN model achieved an impressive accuracy of 96.08 in classifying skin cancer, demonstrating its effectiveness. – Created a real-time web application for skin cancer classification, hosted on AWS and Streamlit cloud platforms	
AI-Powered Virtual Fitting Room	Jul 2023 - Mar 2024
– Objective: Developed an AI-powered virtual fitting room using Python, TensorFlow, and 3D body scanning technology to enhance the online shopping experience. – Utilized Generative Adversarial Network (GAN) algorithms for accurate size prediction based on 3D body scanning images and implemented deep learning algorithms for personalized styling advice. – Hosted the project on AWS and Streamlit, showcasing an innovative application of AI in the retail industry to improve customer satisfaction and online shopping experience.	
Socket Chat App	jul 2024
– Developed a basic chat application using Socket.IO for real-time communication between users. – Implemented the frontend with HTML and CSS, designing a clean and simple user interface. – Utilized React.js to create a responsive user experience and manage real-time updates efficiently. – Integrated socket connections to enable instant message exchanges between users without page reloads	
NetFlix CLone	Nov 2023
– Developed a Netflix-inspired web application using React.js, replicating the user interface and functionalities of the popular streaming platform. – Implemented dynamic UI components for browsing, searching, and filtering movies and TV shows, ensuring a seamless user experience. – Designed a responsive layout using HTML and CSS, making the site adaptable to various screen sizes and devices. – Utilized React hooks like useState and useEffect to manage application state and component lifecycle	

Workshop

Data Science	April 2023
– Attended Workshop on Data Science held at Anna University, MIT Campus - Chennai	
Power BI	March 2023
– Attended Virtual Workshop on Power BI conducted by LUDIFU E-Learning Providers
